ABOUT US

Aqua Oleo Sdn. Bhd. is a multidisciplinary engineering company specializing in the water industry. Our expertise covers process treatment, instrumentation, chemical dosing systems, mechanical and electrical works, and agricultural solutions. Through innovative technologies and proven experience, we deliver reliable systems and services that support sustainable growth and operational efficiency.

In addition to our engineering capabilities, Aqua Oleo has expanded into the Food & Beverage industry, offering nutritious meal preparations, hospital food supply services, and catering solutions for industrial workers and factory canteens. Our dedication to safety, quality, and service excellence ensures we meet the highest standards across every sector we serve .

As a proudly Bumiputera-owned company, Aqua Oleo continues to strengthen its presence by delivering integrated solutions, fostering long-term partnerships, and driving value creation for our clients and communities.

aquaoleo.com

Vision

To be the number one Bumiputera specialized company in Malaysia providing the services related to processing and chemical systems in the water treatment plants.

Mission

To be one of the leading companies that establish high-advanced portable technology water treatments in 2025.

To be a niche, Bumiputera company that specialized in water treatment technology in 2025

To produce the best water quality and water treatment system for domestic use.

Our Objectives

Create and continuously update the new knowledge and current application in the water treatment system.

Provides structured development training for producing Bumiputera experts specialized in water treatment.

Collaboration and building networks with local universities and institution in research to get the best technology in the water treatment system

Renders and strikes the best qualification in the product and services provider.

Our Team

A multidisciplinary team dedicated to engineering solutions and nourishing communities.

Core Services

Comprehensive expertise across process, instrumentation, and chemical systems

1. Chemical Chlorine System

"Pure water, safe solutions"

Chlorine Ejector System

Chlorine Vacuum Regulator

Chlorine header pipe, header valve & cleaning works

Chlorine Flowmeter

2. Metering Pump for Dosing System

"Control with confidence"

3. Booster Pump Servicing

"Pressure you can rely on"

4. Mechanical Troubleshooting

"Keeping your systems moving"

Certificate & Endorsement

Certified to Deliver Quality and Reliability

At Aqua Oleo, we take pride in upholding the highest standards of quality, safety, and compliance. Our certifications and licenses reflect our commitment to excellence and our responsibility as a trusted engineering partner in the water and oil industries. These credentials demonstrate our dedication to delivering reliable, sustainable, and industry-compliant solutions for every project we undertake .
